

PRIVATE MUSIC PROJECT SUBMISSION

Peace, Joyner.

We went into the studio and recorded seven tracks specifically so we could give you a real sense of our direction, work ethic, and potential. All of the material being submitted is currently unpublished.

I also want to provide some context about the day we met. We had a few drinks with ANT while celebrating my brother's freedom because he had just been released from parole that same day. That celebration is not representative of our everyday lifestyle. After serving more than 20 years in prison, our focus now is work, family, music, business, and building something legitimate. We do not use drugs, sell drugs, run the streets, or involve ourselves in situations that could jeopardize anyone working with us.

We respect your business, your career, your sound, and the way you approach music. We are local for the next three to five months and are prepared to work day and night, stay disciplined, take direction, and put everything we have into the right project. We would genuinely appreciate the opportunity to work with you and see what we can build together.

We understand your schedule and the realities of the industry. If we do not hear back within two weeks, we will respectfully understand that you may prefer not to move forward, and we will not take it personally. Either way, we hope you enjoy the music. We will continue to support you, remain fans of your work, and wish you continued success. It's all love and respect.

Respectfully,

Gussacie (Manager)

Taha (Artist)
